

# BrySpan Solid Core Severe Duty Rated Fire Doors FD30

Architectural Joinery Ltd

# BrySpan™ 44mm Solid Core Severe Duty Rated Fire Doors FD30

## Overview

BrySpan™ is a range cost effect high impact doors made to order based on a uniform particleboard core They are available as 44mm FD30 & 54mm FD60 (see different data sheet )

The Particleboard core is usually based on either Strebord or Halspan engineered particleboard BrySpan™ consists of a severe duty rated core as standard which can have veneer, laminate, PVC or other products added to the face

Most edge details are square with the face product (over veneering) the lipping giving a clean looking face also available). The Test Evidence is based on fire burns to BS476 Part22

- **Low Cost**
- **High performance**
- **Large Scope of Test evidence**
- **Excellent range of ironmongery compatibility**

## Usage

These doors are particularly useful in areas likely to be hard wearing such as Schools, Hospitals and high traffic areas & labs. The face substrate has a high resistance to impact & damage. Additional sacrificial kick plates & mid plates can be added to provide greater impact resistance to hard objects such as trolleys etc.

Face Finish in Veneer,  
Laminate or PVC

## **Details** **Specifying**

The BrySpan Fire Rated core the same 3 layer basic core (630 kgm<sup>3</sup> density particleboard) lipped 4 edges in hardwood to match face. The long edges are post formed by a 6mm radius.  
A sheet per face is wrapped around the door overlapping the edges & the lippings..

### **Size variations**

All sizes within scope of Certification of both cores are allowed typically FD30 1/2hr & FD60 Doors in this configuration 3000 x 1000 as single leaf (with or without overpanels 2500 x 890/890 as double leaf (square meeting stiles) with or without overpanel.

### **Intumescent configurations**

We recommend 1 x 15 x 4 intumescent and brush seal to frame section but extended sizes may require additional intumescent to head.

### **Acoustic Details**

BrySpan 44mm are available up to 34db (rw). For higher ratings up to 45db (rw) see BrySound Spec sheets

### **Frame details**

The door can be supplied to fit in to existing frame section & therefore in fire rated scenarios would need to be fully intumesced. The frame could be hardwood or softwood

### **Ironmongery**

Providing the ironmongery is tested to BS476 part 22 most locks and ironmongery is allowed within our global assessment. We recommend specifying rounded forends to reduce pressure on corners. We recommend that Brystewood CNC routers any locks in the doors and that our unique EuroStrike™ is used for strike plates to prevent rattling.

This makes allowance for variations encountered in quality of site fitting

### **Vision Panels**

Vision panels can readily be specified using wired or clear glass to appropriate levels. Test certification covers up to 11 different glass types including Pyroguard, Pyrostop, Pyroshield, Pyrobelite and SureGlaze

L20 BrySpan FD30 Severe Duty Rated doors

220 Solid Core FACED TIMBER DOORSETS IN NEW FRAMES

- Manufacturer & Reference: Brystewood Architectural Joinery Ltd  
Brackner Lane  
Bilsthorpe  
Nottinghamshire  
NG22 8TU  
01623 411415
- Core : BrySpan™ FD30 44mm Particleboard Core ( severe duty rated) for heavy impact areas
- Facings : Veneer/Laminate or PVC faced
- Lippings: Matched Hardwood to suit face or colour contrast for DDA
- Frame : 100 x 44 softwood FD30 12mm rebate
