

Ironmongery and architectural joinery...
brought successfully together, step by step.

First, we take your building project design brief and apply our combined expertise and resources – only then can we prepare a complete door and hardware package to your individual needs. We're also here to advise you to select a cost effective package, which combines all current BS and European legislations.

Once approved close co-operation ensures our CNC database of door preparation details, means the hardware may be quickly and accurately fitted, either in our workshops, or in packaged sets delivered to site.

The final but often overlooked benefit can only be assessed once doors are delivered to site, CNC routed doorsets are accurate to within 0.1mm. This system allows for 120 doors a day to be pre-hung at works by two men. Compare this with the on site fitting practices and the benefit of the Brystewood/Turentek package is clear. The final piece of the jigsaw.

Partners in expertise - working together to save you time and money

When it comes to choosing the right doors and fittings, the marketplace can be a minefield. That's why Brystewood and Turentek have combined their expertise to offer you an ideal solution for your individual design requirements.

The concept of factory-prepared door and hardware packages is certainly not new. However, the partnership, experience and knowledge of Brystewood and Turentek gives you the flexibility to select both a wide variety of door finishes, sizes and styles - and a huge range of designer door fittings.

Normally that's where these two crucial elements part company. However, because of our close co-operation - via complete MS Excel based door and hardware scheduling services - factory installed and precision routed hardware sets can be achieved accurately, and fitted in a fraction of the time taken by on site joinery.

And the result? Impressively different doors with stunning designer door furniture, correctly fitted, at a fraction of the cost.

BRYPEWOOD, QUALITY DOORS AS STANDARD

What sets Brystewood apart from the competition? Maybe it's our self-contained manufacturing facilities. Or perhaps it's the speed, quality and individuality of our supply (typically 3-4 weeks from order).

By working alongside Turentek we can quickly create doors, frames or complete doorsets to a variety of dedicated specifications. It's a comprehensive list that includes Fire Doors, Acoustic, X-ray and Anti Ballistic doorsets, all supplied in a variety of over 80 veneers or thousands of laminate finishes.

We also hold one of the largest ranges of Fire Test certificates to BS476 Part 22 in the country. Not least, our state-of-the-art CNC router capabilities and bespoke joinery division enable us to manufacture the total design concept... in-house.

TURENTEK, THE NAME FOR DOOR TECHNOLOGY

We know that a modern fire door's performance is only as good as the hardware that controls its operation. And that's why we've aligned our expertise with experts in their field, Brystewood.

As specialist suppliers of UK, European and worldwide architectural hardware, our technical staff are able to give impartial expert advice on a wide range of unique hardware applications that include Health, Special Needs, Educational, Commercial and Pharmaceutical projects.

Turentek offer the leading brand names and products, allowing you to choose from an exhaustive list of the best designer Funxion Danish door furniture and concealed in head door controls. As main ASSA, GEZE and Ingersol Rand distributors, we can offer innovative hardware solutions with manufacturers' extended warranties, allowing your clients to benefit from secure, yet safe environments with more than a touch of designer class.
